---

## Professional Summary

Frontend Developer with a strong foundation in JavaScript and React, focused on building responsive, high-performance, and visually engaging web and mobile applications. Hands-on experience delivering full-stack and frontend-intensive projects using modern frameworks, animations, and 3D technologies. Strong understanding of UI/UX principles, Agile workflows, and scalable component-based architectures, with a proactive mindset and high adaptability in collaborative environments.

---

## Technical Skills

### Languages

JavaScript, TypeScript, HTML5, CSS3, C

### Frameworks & Libraries

React, Next.js, React Native, Node.js, Express, GSAP, Three.js, React Three Fiber, Vite, Expo

### Databases

MongoDB, MySQL, PostgreSQL

### Styling & UI

Tailwind CSS, Bootstrap, SASS, NativeWind

### Tools & Platforms

Git, GitHub, Postman, Axios, Stripe, Clerk, Cloudinary, Figma, Trello, Notion, Zustand

### Methodologies

Responsive Design, Component-Based Architecture, REST APIs, Agile / Scrum, Mobile-First Design

---

## Professional Summary

### Frontend Developer (Project-Based) | E-commerce Landing Page (Nike Concept) | Remote | 2026

- Designed and implemented a fully responsive e-commerce landing page using React and Tailwind CSS, ensuring consistent UX across desktop and mobile devices.
- Built reusable UI components that reduced layout duplication by an estimated 30% and improved development efficiency.
- Optimized layout structure and asset loading, achieving faster initial render times and smoother navigation flows.

### Creative Frontend Developer (Project-Based)| Interactive Apple iPhone 15 Website Clone | Remote | 2026

- Recreated an immersive, animation-driven website experience using React, Three.js, and React Three Fiber to render and control 3D models in real time.
- Implemented GSAP-powered scroll-based animations, increasing perceived interactivity and user engagement by approximately 25%.

- Structured complex animations with performance optimization techniques to maintain smooth frame rates across modern browsers.

### **Full Stack Mobile Developer (Project-Based) | E-commerce Mobile Application | Remote | 2026**

- Developed a full-stack mobile e-commerce application using React Native and NativeWind, delivering a native-like user experience on Android devices.
  - Architected a backend with Node.js, Express, and MongoDB, supporting secure authentication, product management, and order processing.
  - Integrated Stripe payment gateway and global state management, enabling secure transactions and reducing checkout friction.
  - Designed scalable API endpoints that supported user growth without performance degradation.
- 

## **Projects**

### **Interactive Frontend Experiments (GSAP & 3D)**

- Built multiple experimental interfaces focused on advanced animations and micro-interactions, improving understanding of motion design and user feedback loops.
  - Applied performance-conscious animation techniques to balance visual impact with load times and responsiveness.
- 

## **Education**

### **Technical Degree in Programming**

National University of San Juan | 2024 – Present

### **Full Stack Developer Bootcamps and Training**

- Valtech – Fundación Karuna – Fundación Pescar | Full Stack Development | 2024 (300 hours)
  - MindHub | Full Stack Developer Bootcamp | 2022 – 2023
  - Telecom Digitalers Bootcamp | 2023 (130 hours)
  - Egg Cooperation | Programming from Scratch | 2023
- 

## **Certifications**

UX Design Professional Certificate – Google (Coursera) | In Progress

Project Management Professional Certificate – Google (Coursera) | 2024

---

## **Languages**

**Spanish:** Native

**English:** B2 (Fluent conversational level)

**German:** A1 (Basic level)
