Professional Summary

Frontend Developer with a solid foundation in JavaScript and React, focused on creating responsive, high-performance, and visually appealing web and mobile applications. Practical experience in full-stack and intensive frontend projects using modern frameworks, advanced animations, and 3D technologies. Strong understanding of UI/UX principles, Agile methodologies, and component-based architectures, with a proactive mindset and high adaptability to collaborative environments.

Technical Skills

- **Languages:** JavaScript, TypeScript, HTML5, CSS3, C
- **Frameworks & Libraries:** React, Next.js, React Native, Node.js, Express, GSAP, Three.js, React Three Fiber, Vite, Expo
- **Databases:** MongoDB, MySQL, PostgreSQL
- **Styles & UI:** Tailwind CSS, Bootstrap, SASS, NativeWind
- **Tools & Platforms:** Git, GitHub, Postman, Axios, Stripe, Clerk, Cloudinary, Figma, Trello, Notion, Zustand
- **Methodologies:** Responsive Design, Component-Based Architecture, REST APIs, Agile / Scrum, Mobile-First Design

Professional Experience

Frontend Developer (Project-Based) | E-commerce Landing Page (Nike Concept) | Remote | 2026

- Designed and implemented a fully responsive e-commerce landing page using React and Tailwind CSS, ensuring a consistent experience across desktop and mobile.
- Built reusable UI components that reduced layout duplication by approximately 30% and improved development efficiency.
- Optimized visual structure and resource loading, achieving faster initial render times and smoother navigation.

Creative Frontend Developer (Project-Based) | Interactive Apple iPhone 15 Clone | Remote | 2026

- Recreated an immersive, animation-driven web experience using React, Three.js, and React Three Fiber to render and control 3D models in real-time.
- Implemented scroll-based animations with GSAP, increasing user interaction and perceived engagement by approximately 25%.
- Structured complex animations applying performance optimizations to maintain a high frame rate on modern browsers.

Full Stack Mobile Developer (Project-Based) | Mobile E-commerce Application | Remote | 2026

- Developed a full-stack mobile e-commerce application using React Native and NativeWind, delivering a native experience on Android devices.
- Architected the backend with Node.js, Express, and MongoDB, supporting secure authentication, product management, and order processing.
- Integrated the Stripe payment gateway and global state management, enabling secure transactions and reducing friction at checkout.
- Designed scalable endpoints that supported user growth without degrading performance.

Projects

- Interactive Operating System Simulator (2026) | [View Project](#) Interactive web application built with React, Tailwind CSS, and Zustand. Demonstrates profound mastery of state management, responsive design, and modern UI/UX.
- E-commerce Nike Clone (2026) | [View Project](#) Premium e-commerce landing page with React, GSAP for scroll-triggered animations, and Stripe integration. Includes advanced interactions and performance optimizations.
- Interactive Apple Clone - MacBook (2026) | [View Project](#) Immersive web experience with React, Three.js, and GSAP. Advanced scroll-based animations, real-time 3D rendering, and performance optimizations for modern browsers.

Education

- **Programming Technician (Tecnatura en Programación)** | Universidad Nacional de San Juan | 2024 – Present

Bootcamps & Full Stack Training

- Valtech – Fundación Karuna – Fundación Pescar | Full Stack Development | 2024 (300 hours)
- MindHub | Full Stack Developer Bootcamp | 2022 – 2023
- Telecom Digitalers Bootcamp | 2023 (130 hours)
- Egg Cooperation | Programming from Scratch | 2023

Certifications

- Professional Certificate in UX Design – Google (Coursera) | In Progress
- Professional Certificate in Project Management – Google (Coursera) | 2024

Languages

- **Spanish:** Native
- **English:** B2 (Fluent Conversational)
- **German:** A1 (Basic)
