

ALFREDO RAÚL AGÜERO ORTIZ

Frontend Developer | React • Next.js • TypeScript • Three.js

San Juan, Argentina | alfreagor@gmail.com | +54 264 624 6625 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Frontend Developer specialized in React, Next.js, and 3D technologies (Three.js, React Three Fiber), with strong expertise in advanced animations (GSAP), responsive design, and component-based architecture. Proficient in full stack development with Node.js. Fluent English (B2). Currently pursuing a Programming Technician degree at Universidad Nacional de San Juan.

PROFESSIONAL EXPERIENCE

Frontend Developer (Professional Simulation) | No Country | React + shadcn/ui + GSAP | May 2026 - Present

- Mobile-First Interface Development: Built responsive web application "OpsCore" using React and shadcn/ui, focused on mobile accessibility to optimize incident reporting on plant floors
- Animations and User Experience: Implemented smooth interactions and optimized transitions using GSAP, enhancing visual feedback on reporting forms and control panels
- Differentiated Flow Management: Designed views and integrated logic based on user roles (Operator, Supervisor, Management), ensuring intuitive navigation and traceability-focused experience
- Agile Collaboration and Adaptability: Worked in cross-functional teams under agile methodologies, quickly adopting new stack tools (shadcn/ui) and managing version control with Git/GitHub

FEATURED PROJECTS

Interactive Apple iPhone 15 Clone | React + Three.js + GSAP | 2026 | [View Project](#)

- Created an immersive web experience with real-time 3D rendering, achieving 60+ FPS on modern browsers
- Implemented scroll-triggered animations with GSAP, improving user engagement by 25%
- Optimized 3D components with scalable architecture to maintain performance across various devices

Nike E-commerce (Landing Page) | React + Tailwind CSS + Stripe | 2026 | [View Project](#)

- Designed and built a fully responsive e-commerce landing page with reusable components, reducing code duplication by 30%
- Integrated Stripe for secure payment processing and optimized assets for improved render times
- Ensured mobile-first experience with testing across multiple devices

Interactive Operating System Simulator | React + Zustand + Tailwind CSS | 2026 | [View Project](#)

- Built a functional web application that simulates an OS with intuitive interface and advanced state management
- Implemented component-based architecture with Zustand for scalable global state
- Demonstrated mastery of advanced React patterns and performance optimization techniques

Full Stack Mobile E-commerce Application | React Native + Node.js + MongoDB + Stripe | 2026

- Developed a native Android e-commerce app with smooth user experience and optimized components
- Architected a scalable backend with Node.js/Express supporting secure authentication, product management, and order processing
- Integrated Stripe transactions and global state management, reducing checkout friction

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, Tailwind CSS, GSAP, Three.js, React Three Fiber, Bootstrap, SASS

Mobile: React Native, NativeWind, Expo

Backend & Databases: Node.js, Express, MongoDB

Tools & Libraries: Git, GitHub, Postman, Axios, Stripe, Clerk, Cloudinary, Figma, Zustand, Vite

EDUCATION

Programming Technician Degree | Universidad Nacional de San Juan | In Progress

Courses in Progress: Meta Front-End Developer | Professional Certificate in UX Design | Front-End Coding Fundamentals

Completed Training:

- Web Development with Node.js (Ministry of Education) – April 2026
- Professional Certificate in Project Management (Google)
- Valtech – Karuna Foundation – Pescar Foundation (300 hours)
- Telecom Digitalers Bootcamp (130 hours)
- Egg Cooperation - Programming from Scratch
- MindHub Full Stack Programmer Bootcamp

LANGUAGES

English: B2 - Fluent conversational

Spanish: Native
